

Women in Design Kansas City is a community of women involved in architecture and the design professions who have come together for mentorship, support, and advocacy for women in design. We provide opportunities for working with our community to educate, enhance, explore and celebrate the historic and present contributions of women in our professions through community outreach, mentorship, programs, and research.

+become involved

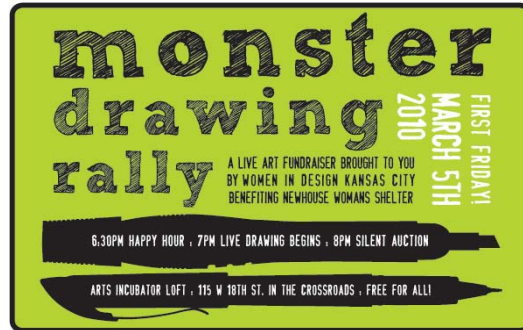

WiD-KC events are held once a month and vary from lectures, to educational programs and community service opportunities. To participate there is no official membership - instead we are an opportunity for women in the design fields to learn about themselves through interaction with others.

Contact info@widkc.org to find out about more ways to become involved in Women in Design - Kansas City.
